

College and University Tips & Additional Information

When choosing an advanced microscope for college and university applications or studies, there are several factors that need to be considered before purchase. Advanced microscopes are used for research and scientific applications, so the quality and precision of the instrument is of utmost importance.

For any purchase, make sure to take price, optical quality and durability into consideration. Avoid making impulsive decisions based solely on the price of the instrument. Low prices have quite an appeal, enticing buyers to purchase without first doing some research.

Know exactly what you want, and know who you are buying from before purchasing your microscope.

A. What type of application/setting do you need the instrument for?

- What type of setting will it be used in?
- Will it be a multi-user environment in a college/university laboratory?
- What type of application(s) will it be used for?
- Will any additional parts or accessories be needed?

B. Who are you buying from?

- Is the supplier a reputable dealer?
- Do they have a thorough understanding of microscopy?
- Do they offer technical support or on-site setup?
- Is their warranty backed up by in-house technicians, who are knowledgeable with mechanical, electrical and optical issues which arise from microscopy use?
- Do they have all the necessary repair/upgrade parts available to support the warranty?

We can confidently say yes to the above questions.

With over 30 years of experience and a vast network of reputable dealerships around the country, we promise to provide professional customer service and quality product at competitive prices. We strive to offer our customers a vast selection of high-quality microscopes that are routinely inspected prior to delivery. Our team of in-house technicians have the experience required to skillfully make the proper adjustments, calibrations and alignments of fine optical parts when needed.

We also offer instructive consultations, where we can give suggestions and advice during the initial purchase process, providing you with the information necessary to make an informative decision based on our expertise and experience in the field. Customer feedback is important to us, which is why we encourage our customers to provide us with feedback post-purchase.

If you're looking to purchase a number of microscopes for a college or university setting, we would be more than happy to send you a sample microscope for evaluation.
